9608 Polo Wall Light Surface Mount Instructions

Step1

A. Take out box contents and check luminaire and accessories are all present for installation.

Step2

A. Use an appropriate sized drill bit to drill two holes into the wall using the central rear metal bracket on the luminaire to measure the correct mounting hole distance (Approximately 20mm).
B. Insert plastic screw plugs into drill holes.

Step3

A. Remove bracket from the back of the luminaire and place the small bracket screws in a safe place.
B. Fix bracket into position using the two large screws provided.

Step4

A. Remove the 6 remaining screws from the back panel to gain access to the junction box and place them in a safe place.
B. Feed cable through the cable gland.

Step5

A. Connect to mains electricity AC100-240V in accordance with current wiring regulations.
B. Loop-in/loop-out connection can be used for continuity of lighting circuit including earth continuity (Max 16A).

Step6

A. Place back panel back in position and secure in place with previously removed screws.
B. Attach the luminaire to the wall bracket and secure using the small bracket screws.
C. Check all fixings are secure and switch power back on before turning on the luminaire.

Images are for information only. Phoebe LED shall not be held liable for improper operation of the luminaire in circumstances where procedures and specifications have not been followed correctly.
